Abeokuta, Ogun state.
July 2018.

Experience

Frontend web developer | Freelance and volunteer frontend developer

February 2021 - Present | Lagos, Nigeria

Developed responsive website prototypes using Html, CSS and javascript for both mobile and desktop platforms.

Developed responsive website prototypes using React js.

TO-DO-APP

I Designed and Developed a to-do-app that helps in organizing daily activities using web development technologies like HTML, CSS, JAVASCRIPT and frameworks like REACT JS, In this project I utilized software Technology to create a software that helps us organize our day we all know how Hectic an unplanned busy day can be. I also added a functionality that keeps track of the due time you input in the activity and alerts you when the activity planned time elapses.

SPACE-TOURISM-WEBSITE

This Project was inspired by my obsession of the outer space and a web development challenge website, it's basically a website that simulates a space tourism Team travelling to outer space and onboarding individuals

who are interested in travelling outer space for a hypothetical tour.my experience Creating this project really improved my experience as a web developer.

This project was created with HTML,CSS,JAVASCRIPT and the REACT JS framework.

TALLY STICKS

This is basically a counter-app I developed and designed to help a store keeper while I was an Intern at VANPEUX GLOBAL SYNERGY.

OTHER PROFESSIONAL EXPERIENCE

Intern

VANPEUX GLOBAL SYNERGY:
worked as a student internship.

Languages

English - Fluent

The store keeper was facing a challenge of keeping Track of the newly arrived stock when they are been delivered and offloaded in the store. So I made her a counter App to keep track of her count and a method to store information to every count like a count title. This project was created using HTML,CSS and plain Javascript.
